

SKILLSPHERE – INTELLIGENT HYPERLOCAL FREELANCE ECOSYSTEM

PROJECT DESCRIPTION

SkillsSphere is a full-stack MERN platform designed to connect clients with freelancers in a hyperlocal environment. The system includes AI-powered job matching, milestone payments, reputation scoring, real-time collaboration tools, and admin analytics dashboards to create a professional freelance ecosystem. The platform enables clients to discover verified local professionals, post projects, and manage payments securely. Freelancers can build portfolios, receive recommendations from the AI matching engine, collaborate with clients, and grow their reputation through verified work history.

ADVANCED KEY MODULES

1. MULTI-ROLE AUTHENTICATION SYSTEM

Roles:

- Client
- Freelancer
- Admin

Features:

- JWT authentication
- Role-based access control (RBAC)
- Google OAuth login
- Email verification system
- Password reset with token
- Two-Factor Authentication (2FA)

2. AI-POWERED JOB MATCHING

Instead of simple filtering:

Features:

- AI matching algorithm for gigs (Huggingface AI)
- Skill similarity scoring
- Personalized freelancer recommendations
- Trending skills detection

Example:

Client posts React Developer job System automatically recommends:

- Top freelancers near the location
- Best match based on rating + skill similarity

3. FREELANCER PROFESSIONAL PROFILES FREELANCER PROFILE INCLUDES:

- Skills with proficiency level
- Portfolio gallery
- Resume upload
- Certifications
- Work experience timeline
- Availability calendar
- Hourly & milestone pricing
- Verification badge system

4. GIG / PROJECT MARKETPLACE

Clients can:

- Create gigs with budget ranges
- Define milestones
- Attach documents
- Invite freelancers
- Track progress

Freelancers can:

- Apply to gigs
- Submit proposals
- Track application status

5. PROPOSAL & BIDDING SYSTEM

More advanced than normal gigs.

Freelancers submit:

- Proposal description
- Bid amount
- Estimated completion time

Client can:

- Accept proposal
- Negotiate price
- Reject proposal

6. REAL-TIME CHAT + COLLABORATION

Built using Socket.IO

Features:

- Instant messaging
- File sharing
- Typing indicators
- Message read receipts
- Video call integration (WebRTC optional)

7. SECURE PAYMENT SYSTEM

Integrate Razorpay / Stripe

Features:

- Escrow payments
- Milestone payments
- Automatic freelancer payout
- Refund management
- Transaction history

8. SMART REPUTATION & REVIEW SYSTEM

Instead of simple ratings.

Features:

- Weighted reputation score
- Verified reviews
- Fraud detection for fake reviews
- Review analytics

9. ADMIN DASHBOARD

Admin controls everything.

Features:

- Manage users
- Suspend accounts
- Verify freelancers
- Approve gigs
- Payment monitoring
- Fraud detection

Admin analytics:

- platform revenue
- active freelancers
- top categories
- job success rate

10. ADVANCED SEARCH ENGINE

Features:

- Location-based search
- Skill-based search
- Price range filters
- Rating filters
- Experience filters

Use:

- MongoDB Atlas Search or
- ElasticSearch (advanced option)

11. NOTIFICATION SYSTEM

Real-time notifications.

Types:

- New gig posted
- Proposal accepted
- Payment received
- Review added

Use:

- Socket.IO
- Email notifications

12. FREELANCER AVAILABILITY SCHEDULER

Calendar system.

Features:

- Availability slots
- Booking system
- Automatic scheduling

13. DISPUTE RESOLUTION SYSTEM

If payment issues happen.

Features:

- Dispute request
- Admin mediation
- Evidence upload
- Resolution system

14. PROJECT PROGRESS TRACKER

Track work milestones.

Features:

- Task completion percentage
- File uploads
- Progress logs
- Deadline reminders

15. ANALYTICS DASHBOARD FOR FREELANCERS

Freelancers can see:

- profile views
- gig applications
- earnings statistics
- monthly revenue chart
- client feedback analytics

SUGGESTED MERN TECH STACK

FRONTEND

- React.js
- Redux Toolkit
- Tailwind CSS
- React Query
- Socket.IO client

BACKEND

- Node.js
- Express.js
- MongoDB Atlas
- Socket.IO
- JWT authentication

OTHER INTEGRATIONS

- Razorpay / Stripe
- Cloudinary (file uploads)
- Nodemailer (emails)
- Redis (optional for caching)

ADVANCED DATABASE COLLECTIONS

Users
Freelancers
Clients
Gigs
Proposals
Reviews
Messages
Payments
Notifications
Disputes
AdminLogs

IMPROVED DEVELOPMENT TIMELINE

WEEK 1

Backend

- Authentication system
- User role management
- Profile APIs

Frontend

- Login/Register UI
- Profile pages
- Dashboard layout

WEEK 2

Backend

- Gig APIs
- Proposal system
- Search APIs

Frontend

- Gig marketplace UI
- Proposal submission
- Search filters

WEEK 3

Backend

- Chat with Socket.IO
- Review & rating APIs
- Notification system

Frontend

- Messaging interface
- Review UI
- Notifications

WEEK 4

Backend

- Payment integration
- Admin dashboard APIs
- Security improvements

Frontend

- Payment UI
- Admin dashboard
- Final UI polish

**THE PROJECT REVIEW WILL BE CONDUCTED ON
03 JUNE 2026, AND PARTICIPANTS MUST SHARE THEIR
SCREEN TO DEMONSTRATE THE PROJECT PROGRESS.**
